EMERGENCY SUMMARY FOR THE TREATING DOCTOR

SYNTHETIC DEMO: not a real patient. Prepared 27 Oct 2026 10:16 for the emergency doctor who receives this patient, possibly at a different hospital. Facts come from the treating hospital's record and the patient's own answers.

1. Why she is being brought in

Alert type	Warning signs in her answers
What triggered it	• Left arm reported as red or hot to touch

2. What she reported today

Today	Left arm red or hot. Asked and answered No: speech slurred or confusion, very hard to stay awake, chest pain or trouble breathing. The call stopped at the first warning sign, so later questions were not asked.

3. Patient

Name, age, sex	Mrs. Lakshmi V., 54, female
Hospital ID	SYN-BC-000142 at Chennai Main (synthetic)
Language	Tamil. The family speaks for her if she cannot.
Family contact	Karthik, her son

4. Cancer history (from the treating hospital's record)

Diagnosis	Carcinoma of the left breast, stage IIB, ER positive, PR positive, HER2 negative (synthetic)
Treatment done	Chemotherapy completed; Left modified radical mastectomy with left axillary lymph node clearance
Active treatment finished	2026-10-01
Now	Post-treatment surveillance. 3-month plan started 2026-10-01.

5. Current medicines (from her care plan)

• Tablet Letrozole 2.5 mg: Once daily in the morning after breakfast
• Tablet Shelcal-HD (Calcium + Vitamin D3): Once daily after lunch
• Capsule Neurobion Forte (B-complex): Once daily after dinner
• No as-needed (SOS) medicines recorded.

6. Her last 30 days, from the record

Date	What the patient reported	Doctor's instruction and outcome
2026-10-10	Mild left arm stiffness in the morning, 2 out of 10. Bangles loose. No swelling.	No instruction recorded. Resolved. Logged in the daily digest.
2026-10-19	Nausea and a mild headache (2 out of 10) still present at the time of the call. Supplements taken with morning tea on an empty stomach.	Dr. Ananya R. (tele-consult 2026-10-19 15:05): take Shelcal-HD and Neurobion Forte only after a full meal. [INST-2026-10-19-01] 24-hour call on 2026-10-20: nausea gone. Ticket closed by the doctor.

Last recorded left arm status: no swelling, bangles loose (recorded 2026-10-10). Last recorded headache score: 2 out of 10 (2026-10-19).

7. Note from her treating oncologist (word for word)

"Left axillary lymph node clearance on 1 October 2026: the left arm is at risk of swelling and infection. Please keep this in mind when choosing a site for blood pressure, blood draws or injections."

Signed by Senior Oncologist, Chennai Main (synthetic), 2026-10-01.

8. Not recorded by CarePilot. Please ask the patient or family.

Allergies, Other medical conditions, Medicines from other doctors, Blood group.

9. Contact the treating team

Chennai Main (synthetic) care team: HOSPITAL-CALLBACK-NUMBER-PLACEHOLDER. Senior Oncologist, Chennai Main (synthetic). Please call to share findings or ask for her records.
